

CASA MAÑANA

Fort Worth, Texas

PROJECT DESCRIPTION

The Casa Mañana renovation and expansion project, completed in October 2023, aimed to add more occupancy space and enhance the existing bar and kitchen area. This project included the removal of a curved load-bearing exterior CMU wall and the integration of steel expansion. Geisler Partners + RLG ensured functionality and structural soundness. This expertise was crucial in ensuring the seamless transition between the old and new portions of the building.

Geisler Partners + RLG have played a crucial role in completing the structural engineering design for the project, ensuring that the renovation and expansion are both functional and structurally sound. The project will breathe new life into Casa Mañana and make it an even more vibrant and accessible space for its patrons.
